Aluminum Signs

3mm Aluminum Composite Panel (ACM)

Print custom metal signage for the outdoors on this durable aluminum with a matte surface for reducing glare.

- Pre-painted bright white front and bare aluminum (mill finish) back
- Optional rounded corners for added safety
- Optional drill holes for easy installing

Durable Outdoor Signage

Thanks to the strong, waterproof qualities of aluminum that help it withstand the elements, these signs are perfect for outdoor use.

Rounded Corners

Rounded corners on metal signs not only help them look more professional but also protect people from getting hurt by the corners in potential accidents.

Optional Holes

Drilling holes into the aluminum sign makes it easier to install. These 3/8" holes can be centered on the top and bottom, on all four corners, or on the top corners only.
